

Private Label SW4309

SW4309 is a very winter hardy FD4 variety with broad adaptation and high yield capabilities. This alfalfa variety has good overall disease resistance. It is highly suited for growing areas in the Northeast, upper Midwest, Great Plains, and intermountain Northwest.

Key Advantages

- *High yielding* variety with a solid pedigree for all-around alfalfa variety performance
- Broadly adapted from the northwest to the northeast and everywhere in between
- High resistance to the major diseases of alfalfa enables broad adaptation across a wide range of soil and growing conditions
- High resistance to stem nematodes, especially important for areas with irrigation water supplied through surface canals, where tail-waters from infested fields can be introduced back into canals to infest downstream fields
- SW4309 puts your best foot forward for growers who desire high yield hay and haylage

Agronomic Traits

- DRI Score: 35/35
- Fall Dormancy: 4
- Yield: 9
- Winter Hardiness: Very Hardy

Pest and Disease Resistance

TYPE	HR	R	MR	LR
Bacterial Wilt	•			
Verticillium Wilt	•
