

Private Label SWFB7002

SWFB7002 is a BMR, brachytic dwarf forage sorghum that has excellent standability. It produces high quality silage in 85 to 90 days—earliest BD on the market—a good choice for double cropping.

Because of its rapid growth, seeding rates below 100,000 seed per acre should be used, with the optimal seeding rate being 75,000 seed/acre.
